MedLocker™
24/7 PRESCRIPTION COLLECTION KIOKS

AUTOMATED DISPENSING OF MEDICAL PRESCRIPTION

A large part of your recipes are repeated recipes which can be easily prepared in time for your clients. Logimatiq has developed a self serve pick-up with MedLocker™ where clients – 24/7 can safely collect their packages without the assistance of a Pharmacy employee. Efficient and very customer-friendly!

With MedLocker™, you can provide a service to your client at any time. Even outside normal opening hours! MedLocker™ is a self serve cabinet with as many positions within a small space. MedLocker™ delivers prepared medication to your clients after they have received a pick-up message. Your clients no longer have to wait for their medication!
MedLocker™ is available in cooled and uncooled models. The cooled MedLocker™ is based on a medical refrigerator. Would you like to know more about how the MedLocker™ and cooled MedLocker™ work? The Logimatiq-team will be pleased to help you further!

How does the MedLocker™ works?

MedLocker™ is controlled by Software. The Cabinet automatically provides information about where the prescription is being stored and from where it can be removed.

Your employee logs in with the cabinet touch screen and connects a scanner to the outside of the cabinet.

After scanning a prescription, MedLocker™ automatically opens a slot where the prescription can be placed. The employee can choose a small or large slot.

As soon as the prescription has been placed into the slot, a notification with a pick-up code will be sent to the client automatically. The client can now use the pick-up code to open the slot that contains his prescription.

BENEFITS

✓ Your client no longer has to endure any unnecessary waiting time and will greatly appreciate this.

✓ The client will no longer come to the counter. MedLocker saves an average of 4 minutes per prescription at the counter.

✓ Pick-up times are spread out; large queues are prevented.

✓ MedLocker can be useful for a Pharmacy service point. You can manage MedLocker from the pharmacy via our cloud Software solution.

✓ In an average pharmacy, MedLocker can save 0.5 full-time employees.
